

PRIVACY POLICY MODEL FOR MOBILE APPLICATION

This privacy policy governs your use of the software application *Voice Aloud Reader* ("Application") for mobile devices that was created by CodeEsteem Marcin Olawski.

What information does the Application obtain and how is it used?

Automatically Collected Information

General information about the type of device, software version, etc. that you are using is collected. Identifying information about your device specifically is not collected.

Does the Application collect precise real time location information of the device?

This Application does not collect precise information about the location of your mobile device.

Crash Logs

Occasionally our apps crash. We use a crash log aggregation service that automatically collects crash logs from our apps. General information about the type of device, software version, etc. that you are using is collected with the crash logs. Identifying information about your device specifically is not collected.

In-App Purchases and Data Processing

The Application offers optional in-app purchases that enhance its functionality. The method of data processing differs depending on the specific version you choose to purchase.

- **Pro Version.** When you purchase the "Pro Version," all processing of your data, including all text-to-speech synthesis, is performed exclusively on your local device. No content from your documents or text inputs is transmitted from your device to our servers or to any third party. Your data remains on your device.
- **Pro + Premium Voices.** This feature utilizes our servers to provide enhanced, high-quality speech synthesis. While your source documents and files remain stored only on your device, the text-to-speech conversion process works as follows:
 - The Application securely transmits only the text of the current sentence being synthesized to our server. The full document is never transmitted.
 - Our server generates an audio stream from this sentence and sends it back to your device for immediate playback.
 - Immediately upon successful transmission of the audio stream, the input text and the generated audio data are permanently and irrevocably deleted from our server. No portion of your content is logged or stored on our servers.

Do third parties see and/or have access to information obtained by the Application?

Only anonymized data mentioned in the section "Automatically Collected Information" are transmitted to external services to help us improve the Application and our service.

What are my opt-out rights?

You can stop all collection of information by the Application easily by uninstalling the Application. You may use the standard uninstall processes as may be available as part of your mobile device or via the mobile application marketplace or network.

Data Retention Policy

We will retain Automatically Collected information for 90 days.

Security

We are concerned about safeguarding the confidentiality of your information. We provide physical and electronic safeguards to protect information we process and maintain. For example, we limit access to this information to authorized employees. Please be aware that, although we endeavor provide reasonable security for information we process and maintain, no security system can prevent all potential security breaches.

Changes

This Privacy Policy may be updated from time to time for any reason. We will notify you of any changes to our Privacy Policy by posting the new Privacy Policy at www.codeesteem.com. You are advised to consult this Privacy Policy regularly for any changes, as continued use is deemed approval of all changes.

Contact us

If you have any questions regarding privacy while using the Application, or have questions about our practices, please contact us at www.codeesteem.com.
